GOVERNMENT AND PUBLIC SECTOR

Cybercrimes

A Financial Sector View

NASSCOM[®]

Shri. Rajesh Aggarwal

IAS, Secretary –Information and Technology,
Government of Maharashtra

Recent reports on Cybercrimes launched against large companies specifically in the financial Sector demonstrate that protecting and securing data is more important now than ever before. Cyber attacks cause an impact on not only the brand value and revenue for the companies but more severely impact the trust of the customers involved in the system. In view of the given challenges, identifying how data compromise occurs and understanding the legal and operational challenges and identifying the different mechanisms of dealing with these challenges faced would arm the system better to fight this menace.

The conference takes a peek on the current scenario of cybercrimes at the National level with a focus on Mumbai, the targeted victims, types of cybercrimes and steps to be taken for securing critical financial infrastructure. It also focuses on the current legal framework available and some of the major challenges faced by the Government Authorities, financial sectors and the judiciary itself. We also look forward to a complete session on the Challenges of dealing with the menace of Cyber Crimes in terms of the Human Capacity, Technology, Jurisdiction and legal issues.

The group of panelists is highly qualified professionals from the Financial sector and the legal fraternity who bring in extensive knowledge and case study learning's in the field of Cybercrimes. This conference aims at understanding the menace well and analyzing various challenges and ways of curbing its effect and work towards a more safe and secure Technology based financial transaction environment.
